Greater Efficiency and Improved Safety for Inmate Transportation

Elite Prisons Transportation Module is a Transportation Management Solution that manages schedules, logistics, staff and vehicles for secure transfer of inmates outside of a facility. Specifically designed for corrections, this transportation system gives Transportation Admissions and Scheduling staff the information they need to move inmates safely and efficiently. Transportation is an optional module for Syscon Elite Prisons and Syscon Elite Jails.

Solving Transportation Challenges

Complexity – Complex rules govern which agencies accept inmates from which facilities, which inmates to transport together and how to handle internal schedules and priorities. The Transportation Module offers an automated system to handle all the complexity and optimize planning for many inmates, facilities, vehicles, routes, stops and staff. This means you can get your inmates to their court appearances on time.

Safety – Inmate and staff face high levels of risk during transportation, including medical risk, risk of escape, or risk of violent interactions. With the Transportation Module, corrections staff get the complete offender information and alerts they need to prevent errors.

Limited Capacity – When investing in more vehicles or drivers isn't an option, the only choice is to use current capacity more efficiently. The Transportation Module offers a solution that will enable agencies to maximize their current staff and vehicles' efficiency. Identify a number of recurring routes and track actual versus expected trip durations. Find the best matches between scheduled trips and offenders who need to be moved.

Benefits for the Whole Team

Administrators and Command Staff – Reduce spend on transportation with more effective planning. Improve relations with other law enforcement and justice agencies by accepting and delivering inmates on time.

Transportation and Corrections Staff – Spend less time on solving scheduling conflicts, planning and paperwork and more time focusing on moving offenders safely. Be prepared with the right information about potential risks on a trip. Move more offenders by optimizing schedules and trips.

Technologists – have confidence working with a proven solution and an experienced partner.

Implementation Services, Training and Support

Through 30 years of experience in corrections, Syscon Justice Systems has built a complete set of in-house skills to ensure the success of every client project, no matter how demanding. With operations on four continents, our team of professionals is committed to working with every client to understand their needs, timelines, and constraints and to ensure effective delivery of their solution.

Manage a vehicle inventory to assign to routes and trips

Browse scheduled trips to find vehicles, staff, vacancies and offender assignments

See vacancies and search offender schedules to fill trips

Transportation Module Functional Description

Transportation Basics

Plan routes

- Define stops at agencies, courthouses, jails, etc.
- Specify rules for each stop (capacity, overnight, from where can they take inmates)
- Connect multiple routes and segments

Schedule, review and update trips

- Review and edit trip detail information
- Record vehicle and staff assignments for each leg of a trip
- Get the next scheduled instance of a trip

Plan movements for inmates

- Propose a time window for moving the offender
- See schedule conflicts
- Handle expected inmates

Assign inmates to scheduled trips

- Search for inmates who's movement plans match the scheduled trip
- View and modify the list of offenders assigned a trip
- See the capacity of stops on a trip and the empty seats for each segment of a trip

Running and Completing a Trip

- Confirming movements, managing beds
- Change selected offenders' status to in-transit

Review or modify inmate/movement/trip information and maintain historical records

- View offender and movement specific information and status
- Search for scheduled/proposed/completed inmate movements
- Check for conflicts: sanctions, non-association, STG, offender schedules, etc.

Extra Functionality Also Available

Support for an approvals process for inmate movements

- Print transportation order request forms
- Track proposal and approval history, reasons and staff actions
- Checks against STG, Sanctions, Non-associations, offender schedules
- Integrate offender assessments into the approvals process

Automatically assign inmates to scheduled trips

- Optimally fill trips based on scheduled dates, must move by dates, don't move until dates, priority, movement type, scheduled trip capacity, and optimal length of trip
- View any remaining approved but pending external movements and assign them manually if necessary
- Re-run the process at will

Manifests

- Review and print a transportation manifest to verify the details of all schedule trips
